

HIV & AIDS

By 2005, India will have more HIV and AIDS sufferers than the continent of Africa.

By 2010, there will be 30 million patients in India.

SKCV is responding by building an extension to our Prema Vihar village to provide integrated care and support for street children who are HIV+, and full hospice facilities for those who develop AIDS.

This can only happen thanks to the generosity of supporters in the UK.
